

Be part of the Multicultural Peer Network

The Multicultural Peer Network facilitates FREE in-language, peer lead support networks that aim to increase the independence, social and community participation for people from culturally and linguistically diverse (CALD) communities, people with disability, their families and carers across NSW.

The peer to peer groups are designed to:

- Help improve social and community participation between people with disability and the communities they live in
- Increase knowledge of mainstream and disability services available to CALD communities, including the NDIS
- Support local communities in making informed decisions about their own lives
- Provide helpful in-language resources to CALD communities
- Create opportunities where CALD communities can continue learning and share information
- Provide ongoing contact for isolated CALD communities
- Train and employ paid Lived Experience Facilitators to deliver five sessions throughout the year

If you would like to know more about the Multicultural Peer Network or how you can connect with a Peer Support group in your area please contact Susie Eve, SSI ILC Coordinator:
